

NOTE:

These AC Adapters are unregulated (except the 68-519-1). All voltage ratings shown are at rated load. For instance a 12volt /500mA unit has an output of 12volts at 500mA. If the load is less than 500mA the output voltage will be higher. Output graphs are available if required.

CSA/UL wall mount adapters with **2.1mm output plug**. Most available in **centre negative** or **centre positive**.

This multi-output switching power supply can be used for the output voltages listed below with loads from 0-1.7Amps. The unit comes with an assortment of changeable plugs suitable for most requirements. The plugs can be easily changed to centre positive or negative. The output voltage is selected by a switch on the back of the adapter.

- 68-519-1** 3, 4.5, 6, 7.5, 9, 12VDC @ 1.7A

NOTE: There are many more adapters available on special order. If our standard stock units are not suitable please check for availability and minimum order quantities. We would be pleased to quote on your requirements.
